

Forest School Friday

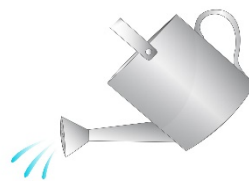

with Mrs Scott!

Week 3 - Natural Ice Decorations

You will need...

- A plastic tub e.g. margarine tub, bowl, empty pot or a Yorkshire pudding tin or pan lid
- A watering can or jug
 - Water
- Berries, leaves, small twigs or any other nice resources you can find outside
 - String or wool

1) When you have collected all your natural resources, arrange them nicely into your pot or tin that you have chosen.

2) Next cut your string and tie a knot to make a loop so you can use this to hang your decoration up.

3) After you have done this fill up your watering can or jug up with water and carefully pour it into your container.

4) Leave this to freeze on a really cold night and in the morning they will hopefully be frozen.

5) You can now hang them up on the tree, bush or fence in your garden to make a beautiful decoration.

I can't wait to see your photographs of your ice decorations,
Mrs Scott
